

Recruitment Team,
Intelliware Development

I am writing this as an applicant for the Software Developer Internship position for the summer of 2017. I am currently a first year Master of Computer and Information Technology student expected to graduate in May 2018. I would bring with learnings and experiences gained during my previous development work at Deloitte Consulting LLP as a Business Technology Consultant for two years as well as Projects related to the field during my Bachelors and Masters studies.

I'm currently developing a Telemedicine Web Application www.MedimailHub.us for Dr. Arjun Parasher which will be deployed at Penn Medicine by the end of the month. My primary role at Deloitte was that of a full stack web developer with SAP-UI5 as a front end framework and a Netweaver Gateway system for the backend. I have worked on two web portals at Deloitte to aid with the recruitment process for the SAP service line in India. Further, I ported these applications to Android and IOS using Phonegap to develop hybrid apps. Not being restricted to specific frameworks or languages I love to venture into new technologies and find myself able to adapt to them easily.

At Deloitte, I have been part of complete project cycles for two Multinational clients in the textile and life sciences industries from Blueprint till Delivery. Having worked with teams from across the globe and having had regular interactions with client counterparts I feel I will integrate well into this position.

I'm very interested in interviewing for the position and am confident that if given the opportunity I will be able to prove myself a good fit. Please find attached my Resume for your consideration which has a more in-depth listing of my work experience at Deloitte, my skill sets as well as a few of my Projects that I would be glad to have a discussion about. Thank you so much for looking into my application and do feel free to contact me at +1 215 960 8611 or email me at jacobva@seas.upenn.edu both of which are mentioned on my resume as well.

Sincerely,
Jacob Varghese
